NEW ENGLAND STEAM COOPERAGE CO.,

OFFICE,

160 STATE STREET,

Boston, Mass.

Gentlemen:

We take pleasure in handing you, for inspection, our illustrated catalogue. Having completed our new factory, we consider our facilities for manufacturing cooperage unsurpassed. Our long experience in the business has enabled us to furnish our factory with the finest quality of machinery and tools, and combining these with the best of stock, and employing as we do the most skilled workmen, we feel confident that our goods are first-class. It is as such we warrant them. We shall endeavor in the future, as in the past, to excel in every department, by adopting modern improvements, and our prices will always be found as low as possible for the class of goods.

Thanking our many patrons for their generous support and encouragement, and hoping to merit a continuance of the same, we are

Yours respectfully,

New England Steam Cooperage Co.

Wm W Smith Pres

NEW ENGLAND STEAM COOPERAGE COMPANY, — BOSTON, MASS.

NEW ENGLAND STEAM COOPERAGE COMPANY,

Boston, Mass.

We call attention to our table on opposite page for the capacity of any Round Tank from 3 feet, mean diameter, to 23 feet 4 inches, mean diameter, inside, 1 inch in depth. Thus a tank 5 feet, mean diameter, 1 inch deep, holds 12.24 gallons; 60 inches deep, would hold 734.40 gallons.

NEW ENGLAND
Steam Cooperage Company,

— MANUFACTURERS OF —

SQUARE TANKS.

In computing capacity of square tanks, multiply inside length, breadth and depth, in inches, together, and divide by 231. The quotient will be the capacity in gallons. 1 gallon of water weighs $8\frac{1}{3}$ pounds, and measures 231 cubic inches. A box $6\times6\times6\frac{1}{2}$ inches inside will hold a gallon.

ROUND, OVAL AND SQUARE TANKS

Of any shape or capacity, up to 100,000 gallons.

— FOR —

PULP AND ALL KINDS OF LIQUIDS.

To find the capacity of a tank of any desired dimensions, find the diameter of the bottom in the first column; the height in the figures over the table and the intersecting square will contain the capacity in gallons, and the number of the tank directly over it. In sending orders for tanks, or information, please send its number with the order. Any intermediate size made if desired.

NEW ENGLAND STEAR COOPERS COMPANY, — BOSTON, MASS.

ALE AND LAGER BEER COOPERAGE.

SPECIAL ATTENTION is given to this department of our work, which is yearly increasing, and at this time we have large orders from the New England and New York brewers. We own large tracts of timber land in the Western and Southern States, and receive our supplies of white oak stock direct from the stump. All our hoops are soft Norway steel, rolled to order, and we guarantee the same weight of steel on each package that other manufacturers use of iron. Our experience teaches us that we save from fifteen to twenty per cent. on broken hoops; also giving the brewers a stronger package than any now in the market. Having improved machinery, we guarantee capacity of that ordered, and use only well seasoned first-class stock of an equalized thickness. All packages are well shellaced on the inside, unless otherwise ordered, and goods are delivered in any part of New England or New York.

We have, in addition to and connected with our factory, a large storehouse, where we keep in stock all kinds of packages, thus enabling us to fill orders promptly at short notice.
